Information Disclosure Statement

1. Due to an inadvertent error on the Examiner's part, the reference to Robb (U.S. Pat. 5,687,022) was not initialed on the returned copy of the Information Disclosure Statement filed June 21, 2004. A corrected copy is being sent herewith.

Specification

2. The disclosure is objected to because of the following informalities: the continuation data in the first paragraph of the specification should be updated (i.e., patent number).

Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 3-9 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,679,839. Although the conflicting claims are not identical, they are not patentably distinct from each other because the

Art Unit: 3739

only difference between the application claims and the patented claims is that claim 1 of the application recites "said lens tube assembly extending substantially the entire length of said lens tube". By definition of an optical relay system, it would inherently follow that in order to relay an image from one end of a tube to another, the optical components must extend substantially the entire length of the tube. However, if not inherent, it would have been obvious to one of ordinary skill in the art to have considered such limitation in the combination of elements of the patented claim since optical relay lens systems that extend the entire length of the relay distance are notoriously well known and the level of ordinary skill in this art would allow one to draw from conventional knowledge.

Response to Arguments

5. It is noted that Applicant has amended claim 1 to incorporate the limitations of claim 2, which was indicated as being allowable over the prior art of record, except for the obvious-type double patenting rejection.

Although Applicant states that a terminal disclaimer was concurrently submitted with the amendment filed March 23, 2005, it was verified by Applicant's representative that such paper was not submitted. It was agreed that a Final Office Action be issued.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3739

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
